Professional Experience

Roblox

DIRECTOR OF ENGINEERING, DEVELOPER MONETIZATION

January 2026 - Present

- Directed the engineering roadmap and full lifecycle of high-scale transaction systems and developer APIs for one of the world's largest virtual economies, leading an organization of 40 to manage billions of monthly interactions and support revenue generation for millions of developers.
- Led a high-performing organization of senior engineers and managers; established rigorous engineering standards (e.g. availability and latency SLOs, code coverage) and cultural practices for mission-critical, distributed monetization infrastructure.
- Developed an ML-based platform for code scanning with use cases like: optimize revenue for both the business and creators, ensure compliance with local regulations and internal policies, and optimize developer code to improve game performance and infrastructure resilience.
- Partnered with Product, Data Science, Design, and Finance to solve marketplace challenges including fraud prevention and price optimization.
- Drove engineering excellence and improved policy posture through hands-on technical contributions.

Pinterest

SENIOR DIRECTOR OF ENGINEERING, CLIENT AND API FOUNDATIONS

January 2024 - January 2026

- Led an org of 150 people (90 FTEs, 60 contractors) including supervising managers of managers across the USA, Canada, and Mexico.
- Directed the modernization of Android, iOS, Web, API, and Design Systems platforms to enhance developer productivity; improve quality and service resilience; and unlock new feature capabilities, positively impacting 750+ internal developers and designers and millions of external customers.
- Spearheaded high-impact initiatives including: transition to Swift (iOS), Modern UDF Architecture (Android), AI development standards, unified API schema definitions, comprehensive Accessibility Audit, React 19 migration, API resilience, Graviton EC2 rollout, Web and API unification, Visual Refresh, CI/CD and Metrics modernization - each significantly improving developer velocity, reliability, and operational efficiency.
- Acted as incident commander in a company-wide on-call rotation, leading resolution of high-severity incidents. Analyzed trends and facilitated post-mortem reviews to connect teams, promote shared lessons, and drive systemic improvements in service reliability across the company.

DIRECTOR OF ENGINEERING, CLIENT AND API PLATFORMS

June 2022 - January 2024

- Led an org of 50 people across 6 teams: Android Platform, iOS Platform, Web Platform, API Platform, Design Systems, and Product Excellence.
- Identified, championed, and drove large-scale initiatives that modernize our clients and API to provide a world-class developer experience.
- Scaled the team through both recruiting efforts and growing internal talent.

Twitch

DIRECTOR OF ENGINEERING

July 2021 - June 2022

- Led an org of 21 people with two managers responsible for Mobile Foundations, Viewer Product, and Community Product.
- Directly managed the Mobile Foundations team including defining north star vision and developing roadmaps to advance mobile development.
- Delivered initiatives like macOS EC2 Migration, Brand Refresh, GraphQL Query Batching support in Apollo, Client Resilience, and Mobile Observability.
- Proposed and spearheaded establishing Twitch's apprenticeship program.

SENIOR ENGINEERING MANAGER

April 2018 - July 2021

- Managed a team of 12 Android and iOS Engineers on 100+ Twitch Viewer and Community infrastructure and customer-impacting projects.
- Planned, organized, reviewed technical design, managed execution and risks with cross-functional teams consisting of over 300 people.
- Delivered key initiatives like Channel Points by collaborating with engineering, product, and design partners.
- Doubled the size of the iOS team in half a year. Hired, mentored, and converted two interns into full-time roles.
- Formed a company-wide Leadership Book Club: a monthly meeting to discuss leadership and management books.

SENIOR SOFTWARE ENGINEER

April 2017 - April 2018

- Developed features for Ads, Clips, Creator, and VOD on both Android and iOS. Developed a Kotlin DSL-style framework for Android UI testing.
- Led initiatives to improve documentation, continuous integration, build times, tracking validation, and real-time monitoring and alerting.

Evernote

SENIOR SOFTWARE ENGINEER

November 2014 - April 2017

- Android and iOS developer building delightful apps for note-taking, organizing, and archiving everything used by millions.
- Led client-side prototyping of a library to deliver rich, interactive messages without requiring an app update.

Smule

SOFTWARE ENGINEER

August 2010 - August 2014

- iOS development (2010 - 2012), Android development (2012 - 2014), and CI / CD on Ocarina, Magic Piano, Magic Fiddle, and Sing Karaoke.
- Managed hardware and software platform for continuous integration and release engineering for Android and iOS.

Education

Princeton University

Princeton, New Jersey

B.S.E. WITH HONORS IN COMPUTER SCIENCE, CERTIFICATE IN SPANISH AND PORTUGUESE | GPA: 3.80

2006 - 2010

Technical Projects

ChuckPad enables users to create, curate, and share code from music programming environments. Developed the Sinatra server, iOS SDK, suite of unit tests, and Docker image for rendering ChuckK patches. Co-author of paper published in [New Interfaces for Musical Expression 2017](#).

SoundCraft enables real-time data gathering from a StarCraft 2 game, allowing for musical interpretation of the game in novel ways. Led development of the data parser and was first author of the paper published in [New Interfaces for Musical Expression 2013](#). Learn more at mark.gg/soundcraft.

Laptop Orchestra Network Toolkit (LOrkNeT) measures and evaluates network conditions for live computer music performance. LOrkNeT was used to identify and remedy issues affecting the Princeton Laptop Orchestra. Learn more at lorknet.cs.princeton.edu.

Fun Facts

- Blogging about video games, food, books, technology, and management on mark.gg since 2013.
- Fluent in English and Portuguese, conversational in Spanish, scrappy Mandarin.
- Enjoys running. Personal record: ran the Big Sur Half Marathon in 1:36:30.
- Undisputed champion of the [BaseTradeTV StarCraft 2 Sponsor Showdown](#). Carriers aficionado.
